TECHNICAL SKILLS

- Languages: Python, R, C++, SQL
- Data: Management & Visualisation
- Version Control: Git & GitHub
- Tools: Microsoft Office & Excel (VBA)
- Modelling: Actuarial, Financial, Simulation, and Statistical

DOMAIN KNOWLEDGE

Finance:
- Business Accounting & Economics
- Corporate Finance
- Investment & Portfolio Management

Risk:
- Actuarial Risk Modelling
- Credit Risk Analysis

Analytics:
- Optimisation Techniques
- Statistical Data Analysis

INTERESTS & HOBBIES

- Problem Solving: Strategic gaming
- Tech Trends: Exploring new tools
- Economics: Tracking financial trends
- AI & Tech Innovation: Experimenting with new frameworks
- Fitness: Cycling

REFERENCES

Hello,

I'm Amogelang Ramatlo

PROFESSIONAL SUMMARY

Quantitative Data Scientist with an advanced academic background in Mathematics, Statistics, and Financial Sciences. Specialising in applying Machine Learning and Actuarial Modelling to solve complex challenges within Credit Risk and Banking. Proven ability to translate quantitative data into business strategy, with a sharp focus on building predictive models, delivering end-to-end analytical solutions, and uncovering actionable insights. Motivated to drive data-driven decision-making and deliver innovative, client-focused solutions in high-stakes financial environments.

EDUCATION

2025 – 2026: **MSc (Data Science)**, University of Cape Town

2021 – 2024: **BCom (Statistics and Data Science)**, University of Pretoria
Majors: Mathematical Statistics and Actuarial Science

2020 – 2021: **BScHons (Mathematics),** University of the Witwatersrand

2016 – 2019: **BSc (Mathematics of Finance)**, University of the Witwatersrand
Majors: Applied Mathematics (CAM), Economic Science, and Mathematics

PROJECTS

Machine Learning: *Engineered and tuned Random Forest and Gradient Boosting models to classify health insurance cost-risk; optimized performance through strategic feature selection*.

Portfolio Optimization: *Applied Mean-Variance and statistical optimization techniques to evaluate asset allocation and maximize risk-adjusted returns across diverse portfolios*.

Quantitative Modelling: *Developed volatility models using stochastic calculus and ARIMA frameworks; simulated price paths for financial risk assessment and trend analysis*.

BEHAVIOURAL CHARACTERISTICS

- Strong analytical skills with a decisive, thorough, and organized approach
- Effective team collaborator with the ability to work well in diverse environments
- Excellent written and verbal communication skills
- Flexible and adaptable in dynamic work settings
- Inquisitive and intellectually curious, with a strong drive for continuous learning and skill development

ACHIEVEMENTS & LEADERSHIP

2025: Microsoft Certified: Azure AI Fundamentals (AI-900)
2025: Actuarial Board Examinations – A111, A113, A211, A213
2024: RE5 Regulatory Examination, Moonstone
2024: Python Data Analysis, LinkedIn Learning
2019: Certificate of First Class, University of the Witwatersrand
(Awarded to students who achieve more than 75% for a module)
